TIME: Saturday 8.45am until 4.30pm. Sunday 9am-3pm

FOOD: Tauhara lunches will be at 12.30pm & dinner 6pm

KEY NOTE SPEAKER - Reflexology with Vivienne Batchelor, B.Ed; B. Nsg; MRNZ

Vivienne set up the Waikato School of Reflexology in 2010 and has taught yearly since then. It is an adult learning experience and students graduate with a new set of skills that may lead into a career in reflexology or be the starting point for further personal development. This may be helpful as another modality for our members to consider as Vivienne views reflexology as complimentary to other natural therapies

Reflexology induces a deep sense of relaxation within the body which allows the healing process to begin within ourselves. This then may enhance other forms of therapy such as Homeobotanical therapy. (Saturday afternoon at 3pm)

PRESENTATION - Gary Beck

An overview of how Gary uses the advanced kinesiology system known as QRA - Quantum Reflex Analysis - developed by Dr Robert Marshall. QRA uses acupuncture points throughout the body to gather information on the state of various organs and system. Then combined with The Emotion Code by Dr Bradley Cooper and working with deep emotional trauma associated with accidents, injury, surgery by using a form of "clay therapy" (Saturday morning at 11.30am)

PRESENTATION Angela Chadwick

Every herb has a special affinity to people's personality, for example the kowhai type is vain, fussy about appearances. If they turn up to your clinic looking immaculate, they may need kowhai in their formula. On the other hand, if a client comes in all in a dither think of Kareao. The workshop lets you find out what personality lurks inside you & the native plants that fits your type. Then we go on a Bush walk. (Sunday 9.15am)

HOMEOBOTANICAL DISCUSSIONS this year will include 2 very interesting handouts from fellow members. Peter Duff's has insightful information on the Thyroid & his method of treatment plus Heather Harris has sent a fascinating regime for treating sick poultry.

ANATOMY & PHYSIOLOGY GROUP WORK is included as usual. Our AGM starts around 2pm on Sunday after conference ends
